THEOCHEM, VOLUME 48 (1988)

(Journal of Molecular Structure, Vol. 179)

SUBJECT INDEX

A-DNA double helices,
sequence-dependent effects in A-DNA double helices 367
Adsorption of H_2,
orbital interactions in large molecular systems: adsorption of H_2 on Ni surfaces 417
Algebraic structure count,
Kekulé count and algebraic structure count for unbranched alternant cata-fusenes 99
4-Aminodiphenylsulfones,
a comparison of QSARs proposed for the inhibition of dihydropteroate synthase by substituted 4-aminodiphenylsulfones 319
Antigens,
theoretical studies of transplantation antigens: predicted conformation and structure–function relationship of the murine MHC class I antigen H-$2K^b$ 27
Asymmetric adsorption,
asymmetric adsorption of ethyliminium cation on kaolinite and L-homochirality of amino acids in proteins 17

B-DNA double helices,
a theoretical study on the hydration of B- and Z-DNA double helices 427
Biochemistry,
correlated events in biochemistry 41
Bioengineering,
an approach to biomolecular electronics and bioengineering based on coenzymes chained to solid supports 165
Bio(macro)molecules,
interactions between bio(macro)-molecules: models and methods 249
Biomolecular electronics,
an approach to biomolecular electronics and bioengineering based on coenzymes chained to solid supports 165

Carcinogenicity,
carcinogenicity of polycyclic aromatic hydrocarbons: a dialogue 47
Cata-fusenes,
Kekulé count and algebraic structure count for unbranched alternant cata-fusenes 99
Chloride binding,
a molecular dynamics study of chloride binding by the cryptand SC24 467
Collagenic structures,
quantum and experimental conformational analysis of model molecules related to collagenic structures 185
Correlated events,
correlated events in biochemistry 41
Cryptand SC24,
a molecular dynamics study of chloride binding by the cryptand SC24 467

Dehydrodimerization reactions,
a theoretical approach to dehydrodimerization reactions 237
Distamycin-oligopeptides,
interaction of distamycin-oligopeptides with the self-complementary $(d\text{-}CAAAGCTTGTG)_2$ duplex in solution 121
DNA bases,
effects of electron correlation upon molecular interactions: correction of the electrostatic interaction between DNA bases 177
DNA-base sequences,
major groove recognition of DNA-base sequence by regulatory proteins and drugs 109

Electric fields,
electric fields around molecules 293
Electron correlation,
effects of electron correlation upon molecular interactions: correction of the electro-

static interaction between DNA bases 177
Electrostatic interaction,
effects of electron correction upon molecular interactions: correction of the electrostatic interaction between DNA bases 177
Ethyliminium cation,
asymmetric adsorption of ethyliminium cation on kaolinite and L-homochirality of amino acids in proteins 17
5-Ethynyl-deoxycytidines,
molecular orbital studies on nucleoside antibiotics. Part IX. Conformation of 5-ethynyl- and 5-vinyl-2′-deoxycytidines 215
Extended polarizable continuum model,
the extended polarizable continuum model for calculation of solvent effects 353

Frenkel exciton approximation,
spectroscopic properties of large molecules in the Frenkel exciton approximation 225

L-Homochirality of amino acids in proteins,
asymmetric adsorption of ethyliminium cation on kaolinite and L-homochirality of amino acids in proteins 17
Hydrogen bonding interactions,
calculation of proton transfers in hydrogen bonding interactions with semi-empirical MNDO/H 153

Iron–oxygen complexes,
metals in biology: low-lying states of iron–oxygen and iron–sulfur complexes modeling electron transfer in redox reactions 1
Iron–sulfur complexes,
metals in biology: low-lying states of iron–oxygen and iron–sulfur complexes modeling electron transfer in redox reactions 1

Kekulé count,
Kekulé count and algebraic structure count for unbranched alternant cata-fusenes 99

Major groove recognition,
major groove recognition of DNA-base sequences by regulatory proteins and drugs 109
Metals in biology,
metals in biology: low-lying states of iron–oxygen and iron–sulfur complexes modeling electron transfer in redox reactions 1
3-Methyluracil,
novel base pairing in nucleic acids: C–H donor group mediated base pairing involving 3-methyluracil 311
Mg^{2+} coordination complex,
a molecular orbital study of a model of the Mg^{2+} coordination complex of the self splicing reaction of ribosomal RNA 145
Models and modeling,
models and modeling in theoretical chemistry 273
Molecular mechanics,
molecular mechanics and molecular shape. Part VI. The response of simple molecules to bimolecular association 83
Molecular shape,
molecular mechanics and molecular shape. Part VI. The response of simple molecules to bimolecular association 83
Murine MHC class I antigen H-2K^b,
theoretical studies of transplantation antigens: predicted conformation and structure–function relationship of the murine MHC class I antigen H-2K^b 27

Ni surfaces,
orbital interactions in large molecular systems: adsorption of H_2 on Ni surfaces 417
p-Nitrophenol,
an examination of some effects of OH rotation in phenol and *p*-nitrophenol 439
Novel base pairing,
novel base pairing in nucleic acids: C–H donor group mediated base pairing involving 3-methyluracil 311
Nucleic acid bases,
ab initio molecular orbital study of the pairing and stacking interactions between nucleic acid bases in relation to the biological activities 451
Nucleic acids,
novel base pairing in nucleic acids: C–H donor group mediated base pairing involving 3-methyluracil 311
Nucleoside antibiotics,
molecular orbital studies on nucleoside antibiotics. Part IX. Conformation of 5-ethynyl- and 5-vinyl-2′-deoxycytidines 215

OH rotation,
an examination of some effects of OH rotation in phenol and *p*-nitrophenol 439
Oligomer chains,
on the restricted Hartree–Fock description of oligomer chains with expected metallic character 393
Orbital interactions,
orbital interactions in large molecular systems: adsorption of H_2 on Ni surfaces 417

Pairing interactions,
ab initio molecular orbital study of the pairing and stacking interactions between nucleic acid bases in relation to the biological activities 451
Phenol,
an examination of some effects of OH rotation in phenol and *p*-nitrophenol 439
Polycyclic aromatic hydrocarbons,
carcinogenicity of polycyclic aromatic hydrocarbons: a dialogue 47
Proton transfers,
calculation of proton transfers in hydrogen bonding interactions with semi-empirical MNDO/H 153
Pyroelectric luminescence,
are intermediate electronic states responsible for pyroelectric luminescence? 305

QSARs,
a comparison of QSARs proposed for the inhibition of dihydropteroate synthase by substituted 4-aminodiphenylsulfones 319

Redox reactions,
metals in biology: low-lying states of iron–oxygen and iron–sulfur complexes modeling electron transfer in redox reactions 1
Restricted Hartree–Fock description,
on the restricted Hartree–Fock description of oligomer chains with expected metallic character 393
Ribosomal RNA,
a molecular orbital study of a model of the Mg^{2+} coordination complex of the self splicing reaction of ribosomal RNA 145

Sequence-dependent effects,
sequence-dependent effects in A-DNA double helices 367
Solvent effects,
the extended polarizable continuum model for calculation of solvent effects 353
Spectroscopic porperties,
spectroscopic properties of large molecules in the Frenkel exciton approximation 225
Stacking interactions,
ab initio molecular orbital study of the pairing and stacking interactions between nucleic acid bases in relation to the biological activities 451

Thermodynamic systems,
structure and free energy of complex thermodynamic systems 333
Transition metal complexes,
electronic structure and bonding of transition metal complexes MCO (M=Cu,Fe,Ti) 407
T-shaped triatomic van der Waals' molecules,
application of adiabatic theory of vibrational predissociation to T-shaped triatomic van der Waals' molecules 135

Vibrational predissociation,
application of adiabatic theory of vibrational predissociation to T-shaped triatomic van der Waals' molecules 135
5-Vinyl-2′-deoxycytidines,
molecular orbital studies on nucleoside antibiotics. Part IX. Conformation of 5-ethynyl- and 5-vinyl-2′-deoxycytidines 215

Z-DNA double helices,
a theoretical study on the hydration of B- and Z-DNA double helices 427
